

2016 Marathon H3-45

Coach #1229

Dual Prevost Slide w/rear Super Slide

Marathon Hallway Power Bunks w/ dual I pads

Full Bath and Half Bath Feature

Allsion Transmission Brake Feature

This was a factory show coach, with multiple new concepts that were featured in a 40 page hardcover box that comes with the coach. 1229 saw extensive Oregon service in 11/25. Once the coach arrived to us in 2/26, we spent 2 month driving and residing in the coach, and had Marathon Florida address the needs we discovered (coach will come with those records).

This coach paint scheme is a true one of a kind. And we have gone from the front to rear bumper, with a full and extensive detailing of any and all needs. Finalized with complete wax and ceramic covering.

Below we will list the features and upgrades

Michelin 315s and 365s NEW 4/2026

Front end alignment

New Koni shocks at ALL locations front and rear

2024 Head Light upgrade 3 Zone heat floor system Electric Fireplace

Volvo Motor with upgrade feature 20 KW Kohler GenSet 670 Hr's

Full Engine Detailing All new fan belts with full spare kits

#8 Stainless package on all engine louvers Clear Marker Light Upgrade

The bunk feature on this coach offers so many options. Center electric curtain for privacy without closing the doors, partial closing of the doors, or full closure of the doors. This is our third Marathon bunk coach, but the first with the power upper bed. This means if the children or grand children are not aboard, you have a full size 72 inch closet with the push of a button with all kind of additional storage for various other needs a coach requires (small ironing board, vacuum, broom, etc)

The transmission retarder in lieu of the exhaust brake is a huge asset for taking where and tear of the disc brakes. We just did 1400 miles for a rally pulling our 28ft tanker (new brake controller added) and the retarded almost totally reduced using brakes in the mountains. For enhanced performance to the D13 Volvo motor, we have added a package that greatly assets torque and fuel efficiency. The full package of all Koni shocks at ALL locations, almost minimizes the lateral roll of the H model.

This is another great example of what we do to bring our coaches to best of ability to the latest and greatest standards, to meet our clients expectations. We are centrally located in Chattanooga Tn. and easy to fly or travel to see this one of a kind "Bunk Coach"
